

ESG PORTFOLIO SERVICES

At Jones Hargreaves we recognise that each of our clients has their own demands and objectives in relation to ESG goals and requirements – thus making off the shelf solutions not fit for purpose.

We therefore specialise in delivering tailored solutions that are reflective of the specific needs of the individual Client and their investors, ensuring that ESG is placed not just at the heart of day-to-day management of property, but also influences decisions made in projects of all scopes and sizes.

Our in-depth knowledge of buildings alongside the processes that govern commercial real estate allows us to identify the most appropriate solutions for addressing risks and maximizing opportunities.

Our commercial focus also ensures that value is added and future proofed wherever possible.

Our Portfolio services are designed to take the burden of ESG monitoring and reporting away from our clients leaving them safe in the knowledge that risks are being managed and opportunities to add value are being identified.

Our ESG Portfolio Services Include:

- ESG Auditing, Data Collection and Monitoring
- Portfolio Reporting
- CRREM Analysis and Reporting
