

Fire Safety Management and Compliance

Physical fire precautions must be supported by effective management systems to remain reliable throughout the life of a building. Jones Hargreaves Fire assists clients in developing, reviewing and improving their fire safety management arrangements in accordance with the principles of BS 9997.

Our support can include reviews of policies, responsibilities, emergency procedures, inspection and testing regimes, contractor controls, record keeping, action tracking and the management of change. We can also help organisations develop proportionate procedures across individual properties or larger portfolios, providing greater consistency and visibility of outstanding risk.

This service is particularly valuable where ownership, occupation or management arrangements are complex, or where clients require a structured system for demonstrating that fire safety risks are being actively identified, monitored and controlled.
